- McCulloch, Walter F. *Woods Words*. Portland: Oregon Historical Society & Champoeg Press, 1958. The language of the woods, even today, has a unique set of words. This book lists about 4,000. Many pertain to railroad logging or high-line yarding and while most of those words are no longer in use if you want to know the meaning of a "woods word" this is where you will find it. Unfortunately, the book is out of print and is expensive to purchase IF a copy can be found.
- McCullough, David. *The Path Between the Seas: The Creation of the Panama Canal, 1870-1814*. New York: Simon and Schuster (A Touchstone Book), 1977. I read this book not only because McCullough presents his material in such a wonderful form but also because I wanted to explore our nation's tendency to be imperialistic. The maneuvers by which we obtained entry into Panama, starting in 1842, and by which we eventually became "owners" of the canal speaks vividly to the lengths this country has gone to get what it wants. These tendencies towards imperialism have direct connections with the way in which the nation's national forests were created -- and involve the same man: Theodore Roosevelt.
- McCullough, David. *Brave Companions: Portraits in History*. New York: Simon & Schuster (A Touchstone Book), 1992. McCullough is a remarkable writer, very easy to read, who has a love affair with history. The range of stories in this collection are amazing for their breadth as well as the quality of writing and instructive value.
- Meacham, A. B. *Wigwam and Warpath; or the Royal Chief in Chains*. Boston: John P. Dale and Company, 1875. The Preface alone will appall you. If you have any illusions about this nation's early goal of exterminating the indigenous people from this land, read this book.

A founder of Greenpeace, Moore turned away from the mainstream environmental movement because he feels they have become too radical. He writes beautifully and his photography is breath-taking. His descriptions of forest functions read like poetry. He describes the natural succession of rock to soil in words that glow with beauty.

- Nash, Wallis. *OREGON: There and Back in 1877*. Corvallis, Oregon: Oregon State University Press, 1976. Mr. Nash came to Oregon to determine the state's value for English settlement. He liked what he saw so well that two years later he moved his family here. He was instrumental in, among other things, making Oregon State University a great educational institution. Mr. Nash was, however, hoodwinked by developers into investing in the ill fated Willamette Valley and Cascade Mountain Wagon Road Company. He lost a lot of money.

A photograph of a Hudspeth Oklahoma sawmill is included.
- Pope, Clem L. *Switchback to the Timber*. Hood River, Oregon: Old Forester Publishing Co., 1992. A wonderful account of the Oregon Lumber Company. The story of David Eccles is indeed remarkable.
- Pratt, Alice Day. *A Homesteader's Portfolio*. Corvallis, Oregon: Oregon State University Press, (Original

Edition: 1922). How Alice lasted at Post, Oregon, as long as she did is beyond me. Her homestead was a sad excuse for farm land. One day Alice's cow was not doing well so Alice walked the animal to Prineville to the vet. The road was longer then and in much worse condition. A true pioneer, but she came to her senses and returned to her family in the east.

Puter, S.A.D. *Looters of the Public Domain*. Portland, Oregon: Portland Printing House, 1907. A famous -- or rather infamous -- book that details Oregon's land fraud years. Land fraud was worse in Oregon than in any other state in the Union. Mr. Puter wrote this book from his jail cell.

Reed, Roy. *Faubus: The Life and Times of an American Prodigal*. Fayetteville, Arkansas: University of Arkansas Press, 1997. You may wonder what connection a Governor of Arkansas has to the timber history in Crook County, Oregon. Legitimate wonder. Like many places, little has been written about the history, geography, politics, or economics of very rural areas. This seems especially true in the South. Orval Faubus came from Madison County, Arkansas, not far from Marble where the Hudspeths grew up. Roy Reed's book gives detailed, and very readable, descriptions of Orval's early environment. He was growing up at about the same time as the Hudspeths so this gave me good insight into conditions between 1904 (when the Hudspeths left the farm for the town of Marble) and the late-1920s when they departed Arkansas for Oklahoma.

Roberege, Earl. *Timber Country Revisited*. Olympia, Washington: Washington Contract Loggers Association, 1991. A reissue of Roberege's earlier work. Roberege is a photographer of some renown and I can see why. His insight into the timber industry is very good although he is more pro-industry than total objectivity would allow. For the timber history enthusiast, this is a must-have book.

Fayetteville, Arkansas: University of Arkansas Press, 1986. The logging and sawmill operations described in this very well written book take place south and west of where the Hudspeths got their start in the timber business. Even so, the conditions described must have been similar to what the Hudspeths experienced in their smaller Arkansas operations. There are connections between Arkansas and Oregon beyond just the Hudspeth family detailed in this book.

- Publishing Company, 1983.
- White, C. Albert. *A History of the Rectangular Survey System*. Washington, D.C.: U.S. Government Printing Office, 1983. The survey of the public domain was the largest survey project ever undertaken. Al White's book has wonderful detail -- sometimes very technical -- on this huge task. Not for casual readers, moderately expensive.
- White, C. Albert. *Initial Points of The Rectangular Survey System*. Westminster, Colorado: The Publishing House, 1997. Here Mr. White explores in greater details the thirty some points upon which the survey of the nation rests. We in Central Oregon refer all our survey data to the Willamette Meridian. Mr. White, who is retired from the Bureau of Land Management, toured the country with his wife to research this subject. While tripping about the land he took photographs of all initial points. Quite expensive.

- Wilkinson, Charles F. *The American West: A Narrative Bibliography and a Study in Regionalism*. Niwot, Colorado: University Press of Colorado, 1989. If you want to know about the American West you need this book. Wilkinson discusses almost 500 books about the west -- mostly non fiction but also some fiction. A tremendous reference tool. But out of print.
- Wilkinson, Charles F. *Crossing the Next Meridian: Land, Water, and the Future of the West*. Covelo, California: Island Press, 1992. If you love the land you should read this book. I regret that it didn't come to my attention earlier in my research. If you think you know about the impact humans are having on the land you had better check your perceptions against Wilkinson's book. Not an environmentalist but a professor of law, Wilkinson's love of the land and the west has sent him out to see what we are doing to the land. You may not like what he has found. We have not been good stewards; not for a long time.

- Winchester, Simon. *The Professor and the Madman: A Tale of Murder, Insanity, and the Making of the Oxford English Dictionary*. New York: HarperCollins Publishers, Inc., 1998. Throughout the manuscript for GREEN GOLD, the Oxford English Dictionary has been the source for word definitions. This remarkable 21-volumn publication's history is longer than that of the timber industry in central Oregon. Knowing how the work was created and who the creators were provides greater understanding of the value of the OED itself. This set of "word books" has been invaluable in the writing of GREEN GOLD.
